

Aluminium Composite Panels

for sign, display and printing applications

An aluminium composite sheet that's strong and easy to handle. This panel offers weight-saving benefits by using a corrugated plastic core. A perfect base for vinyl application, it's equally suited to being fabricated and formed.

PAINT FINISH

White PE coating available in a gloss or matt finish

ALUMINIUM SKIN

0.3mm quality aluminium skin provides rigidity and robustness and offers excellent processing qualities

PROTECTIVE FILM

Protects the surface of the panel

CORE

Corrugated polyethylene core

ADHESIVE

Superb bond between core and aluminium skin
